

TO ENSURE A SUCCESSFUL INSTALLATION, PLEASE TAKE A MOMENT TO READ OUR PRODUCT INSPECTION REQUIREMENTS AND CLAIMS POLICY

ATTENTION PURCHASER/DEALER/INSTALLER;

Before any product is installed, all material must be inspected for quality, visual defects, and to ensure that it is the correct product style/design/color chosen by the customer. It is your responsibility to ensure products are installed only where recommended by the manufacturer/distributor. If any material is in question, DO NOT install it. Stop the job and seek technical support through the flooring dealer or your HomerWood Retail Representative prior to proceeding with the installation.

Check List:

- ✓ Is the product satisfactory in every respect and the correct product chosen?
- ✓ Do you have and understand all of the required installation instructions?
- ✓ Have you ensured that the proper manufacturer/distributor job-site installation conditions exist?
- ✓ Have you inspected all product for proper installation fit, and visible defects?

If any of the above items are not confirmed, do not install. Stop the job and seek technical support through the flooring dealer or HomerWood Retail Representative prior to proceeding with the installation.

In the event of claims issues, all claims must first be inspected by the dealer, prior to inspection by your HomerWood Distribution Representative. All claims must be brought to the attention of your HomerWood Retail Representatives first.

Once a product is installed, cut or altered, HomerWood assumes no further responsibility for the product for any reason whatsoever. If defective or incorrect product is installed, any labor related to removing and replacing such product will NOT be covered.

****Goods sold as seconds, specials and clearances are sold as is and no claims will be considered.**
